2. User Dashboard

After successfully login as a customer you will redirect to <https://www.webmessage2u.com/dashboard>

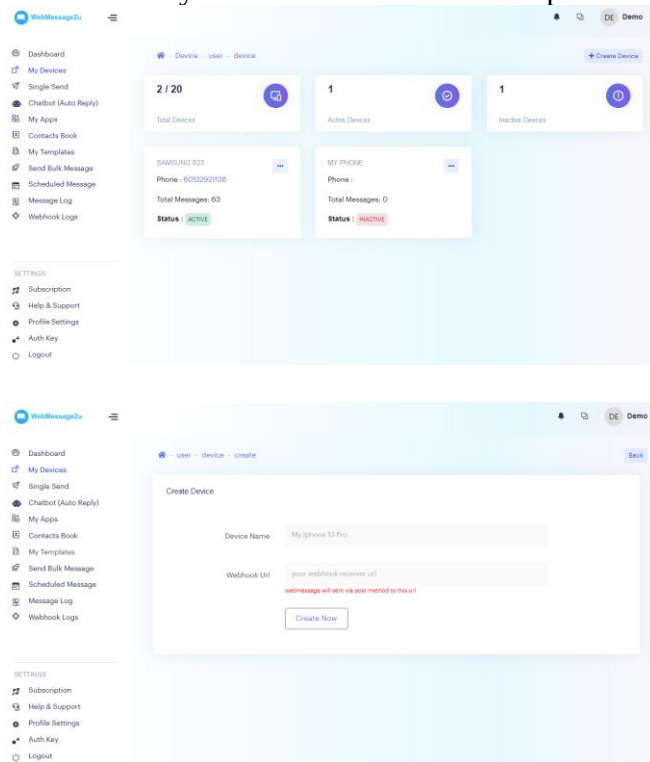

The screenshot displays the WebMessage2u user dashboard. The interface includes a top navigation bar with the WebMessage2u logo, a hamburger menu, and user information (DE Demo). A left sidebar contains a list of navigation items: Dashboard, My Devices, Single Send, Chatbot (Auto Reply), My Apps, Contacts Book, My Templates, Send Bulk Message, Scheduled Message, Message Log, Webhook Logs, and a SETTINGS section with Subscription, Help & Support, Profile Settings, Auth Key, and Logout. The main dashboard area features a breadcrumb trail (Dashboard - user - dashboard) and two action buttons: '+ Create Device' and 'Sent a message'. Below these are four summary cards: 'TOTAL DEVICES 3', 'TOTAL MESSAGES 337', 'PENDING SCHEDULES 0', and 'TOTAL CONTACTS 3'. The dashboard is divided into four main sections: 'Messages Transaction' and 'Automatic Replies' (both showing 'Last 7 Days' filters and a value of 0), 'Messages' (showing 'Last 7 Days' filter), and 'Devices Statistics'. The 'Devices Statistics' section lists three devices: 'Samsung S23 (60122921138)' with 63 messages and an online status, 'My Phone' with 0 messages and an offline status, and 'My phone 2' with 0 messages and an offline status.

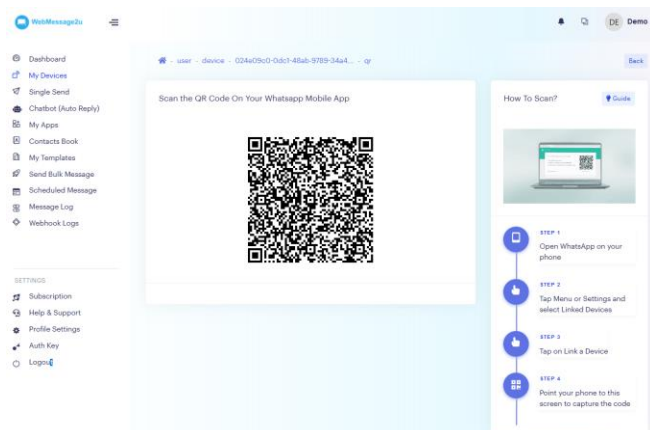

3. How to create a device

Go to <https://www.webmessage2u.com/user/device/create>

Or click to My Devices > Create Device option from user sidebar

Enter the name of your Device and also the Webhook URL if you wish to push all inbound messages to a target

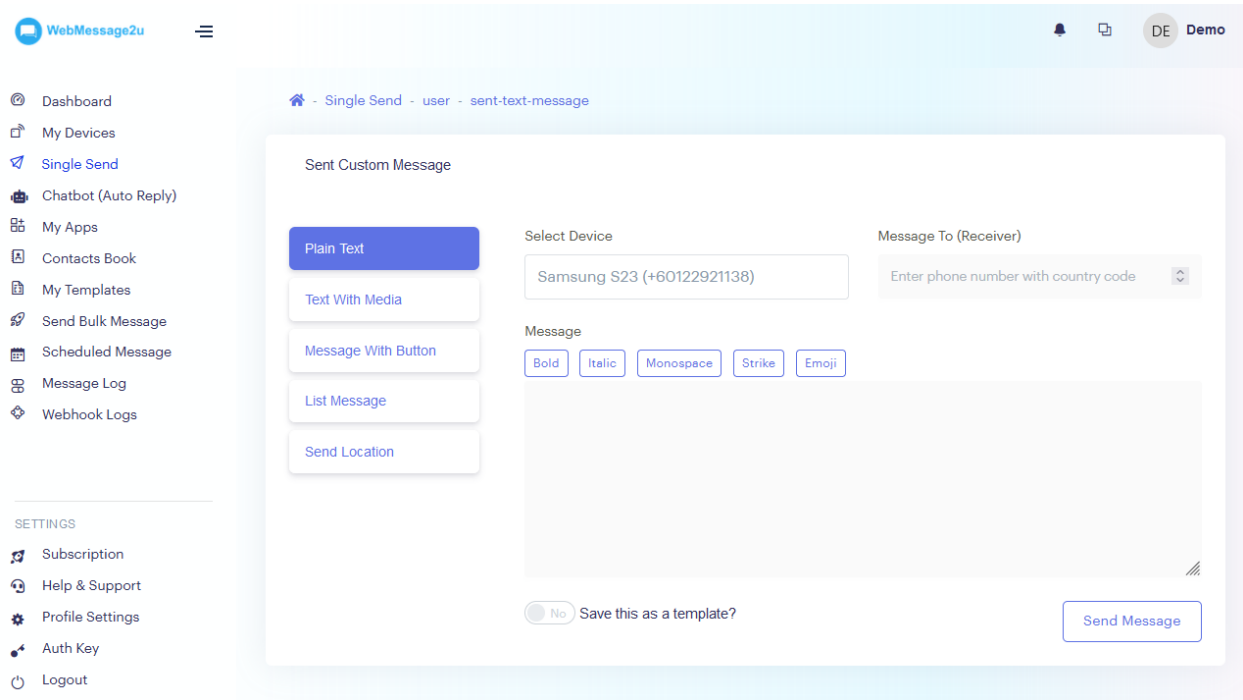

After the device is successfully scanned, the device will be listed under My Devices.

4. How to send message to single person

Go to <https://www.webmessage2u.com/user/sent-text-message>

Or click to **Single Send** option from user sidebar

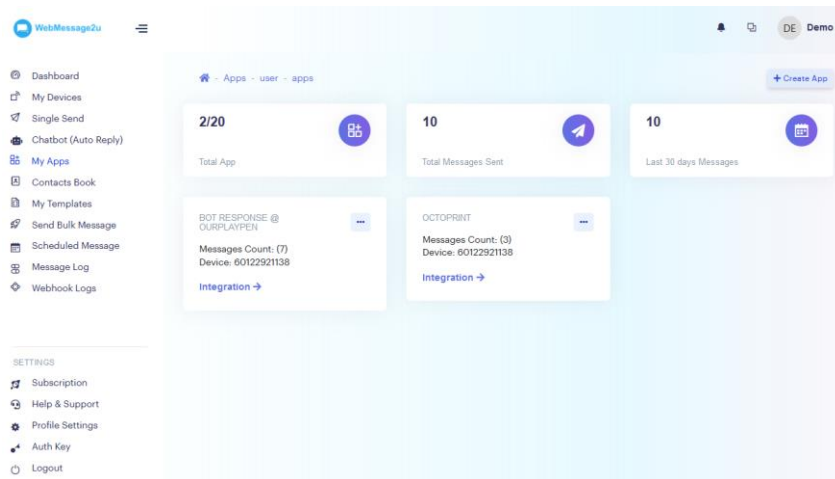

1. Select the Device you wish to send the message from.
2. Enter the Recipient's Number
3. Enter the Message
4. Click on **Send Message**

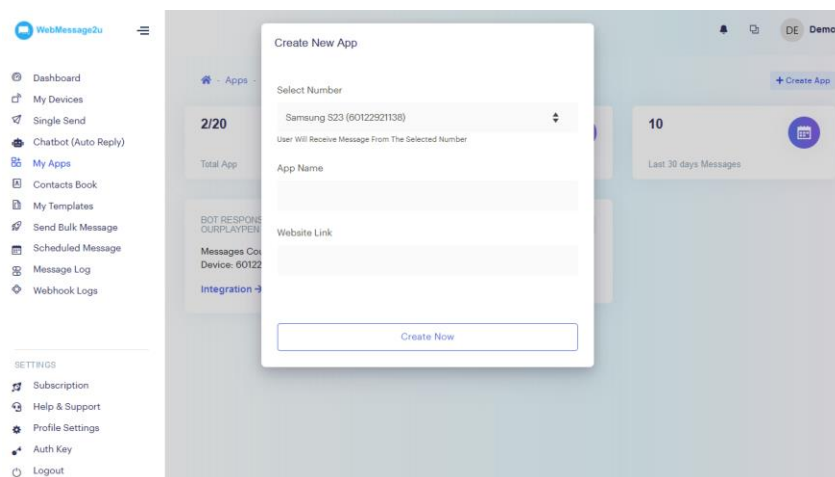

5. APPS or API integration

Go to <https://www.webmessage2u.com/user/apps>

Or click to **My Apps** option from user sidebar

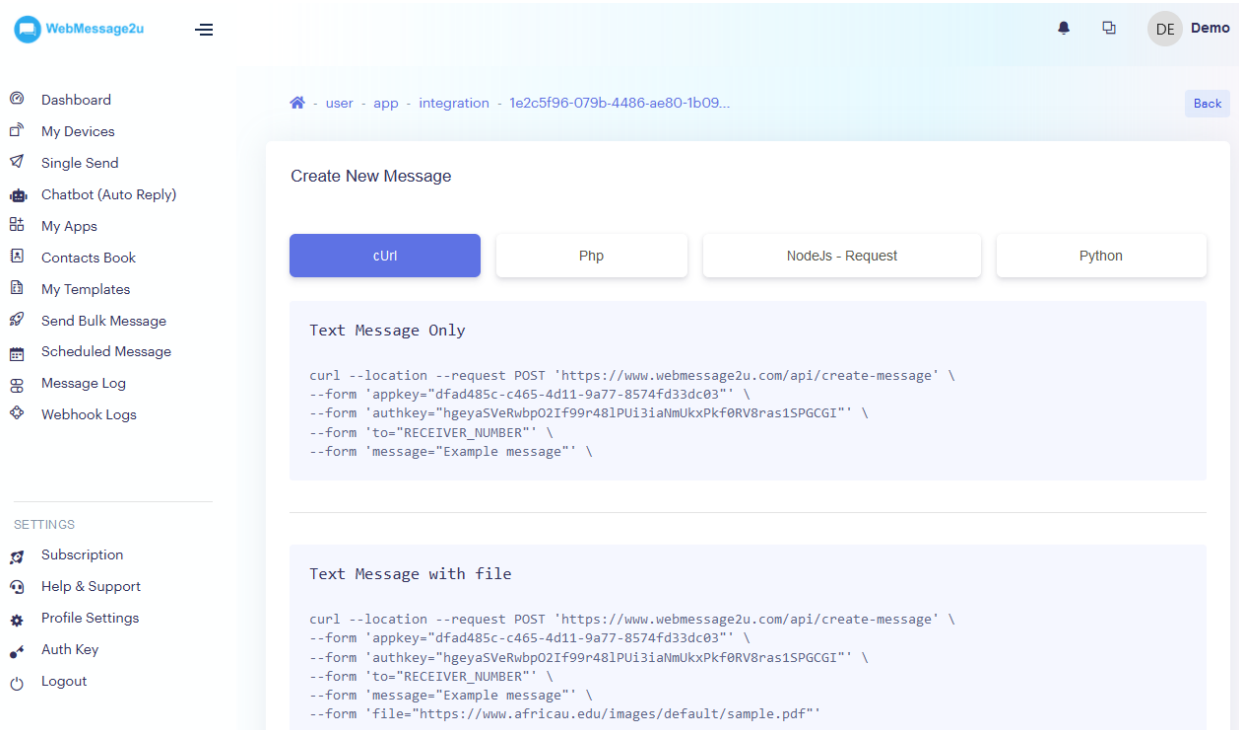

Click on Create App and fill in the relevant details:

1. Select the device you wish your APP to link to
2. Key in the APP Name
3. Provide the Website Link URL where your APP will be located
4. Click **Create Now**

After creating the APP, you will then be able to see example codes to use for your APP. Example codes are provided for:

- cUrl
- Php
- NodeJs
- Python

The screenshot shows the WebMessage2u dashboard. On the left is a sidebar with navigation links: Dashboard, My Devices, Single Send, Chatbot (Auto Reply), My Apps, Contacts Book, My Templates, Send Bulk Message, Scheduled Message, Message Log, and Webhook Logs. Below these are settings: Subscription, Help & Support, Profile Settings, Auth Key, and Logout. The main content area is titled 'Create New Message' and features four tabs: cUrl (selected), Php, NodeJs - Request, and Python. Under the 'cUrl' tab, there are two sections: 'Text Message Only' and 'Text Message with file', each containing a cURL command for sending a message via the WebMessage2u API.

```
curl --location --request POST 'https://www.webmessage2u.com/api/create-message' \
--form 'apikey="dfad485c-c465-4d11-9a77-8574fd33dc03"' \
--form 'authkey="hgeyaSVeRwbp02If99r481PUi31aNmUkxPkf0RV8ras1SPGCGI"' \
--form 'to="RECEIVER_NUMBER"' \
--form 'message="Example message"' \
```

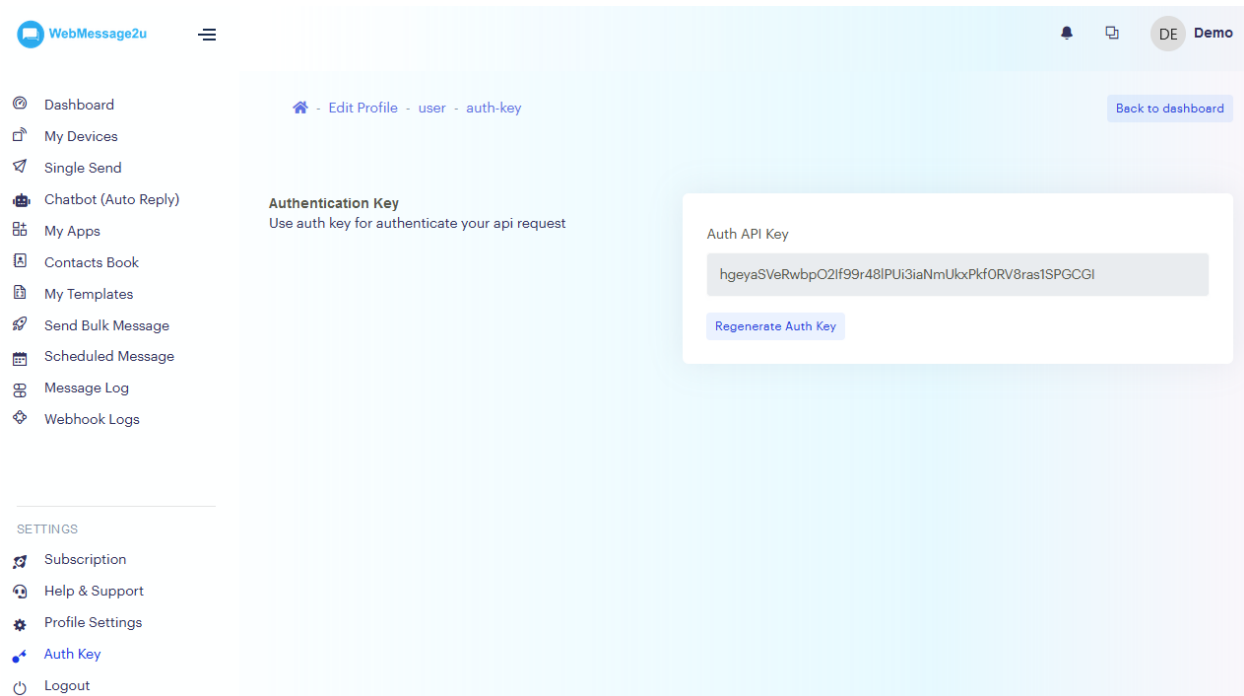

```
curl --location --request POST 'https://www.webmessage2u.com/api/create-message' \
--form 'apikey="dfad485c-c465-4d11-9a77-8574fd33dc03"' \
--form 'authkey="hgeyaSVeRwbp02If99r481PUi31aNmUkxPkf0RV8ras1SPGCGI"' \
--form 'to="RECEIVER_NUMBER"' \
--form 'message="Example message"' \
--form 'file="https://www.africau.edu/images/default/sample.pdf"' \
```

Each APP (linked to your device) will have their own APPKEY and AUTHKEY for authentication purposes. Messages will be sent out from the particular device which you have created and selected.

6. Authentication Key

Go to <https://www.webmessage2u.com/user/apps>

Or click to **Auth Key** option from user sidebar

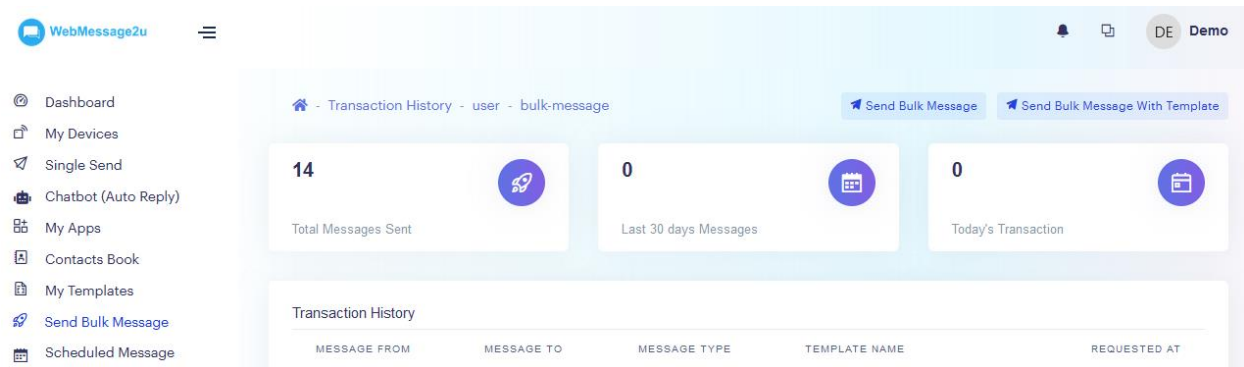

The screenshot shows the WebMessage2u user interface. The top navigation bar includes the WebMessage2u logo, a hamburger menu, a notification bell, a share icon, and a user profile icon labeled 'DE Demo'. The left sidebar contains a list of navigation items: Dashboard, My Devices, Single Send, Chatbot (Auto Reply), My Apps, Contacts Book, My Templates, Send Bulk Message, Scheduled Message, Message Log, and Webhook Logs. Below the sidebar is a 'SETTINGS' section with links for Subscription, Help & Support, Profile Settings, Auth Key (highlighted in blue), and Logout. The main content area displays the 'Authentication Key' page, which includes a breadcrumb trail 'Edit Profile - user - auth-key' and a 'Back to dashboard' link. The page title is 'Authentication Key' with a subtitle 'Use auth key for authenticate your api request'. A white box displays the 'Auth API Key' as 'hgeyaSveRwbpO2If99r48lPUi3iaNmUkxPkf0RV8ras1SPGCGI' and includes a 'Regenerate Auth Key' button.

Auth Key is used to integrate your custom app with our API. This key is needed for verification & authentication. Keep this identification safe at all times.

7. Send Bulk Message

Go to <https://www.webmessage2u.com/user/bulk-message>

Or click to **Send Bulk Message** option from user sidebar

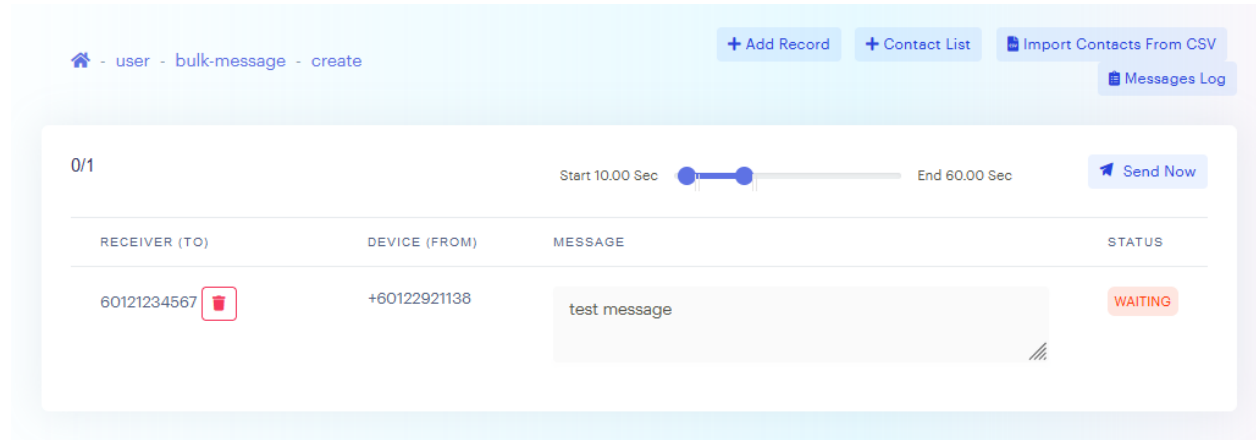

Select bulk option type **Send Bulk Message** or **Send Bulk Message With Template**

Send Bulk Message

1. Add Record (add new single record)
 - Select Number (Device From)
 - Enter Receiver (To) . Multiple numbers are possible using commas
 - Enter Message
 - Click Add Now
2. Contact List (import contact list from contacts book)
 - Select Number (Device From)
 - Enter Group
 - Enter Message
 - Click Import
3. Import Contacts From CSV (import contacts from CSV)
 - Select Number (Device From)
 - Select CSV file to upload
4. Messages Logs (Messages Logs)

Once messages have been created, click on Send Now to begin delivery. You will need to stay on the page to continue sending messages. Do not disconnect from the web page.

8. Contacts Book

Go to <https://www.webmessage2u.com/user/contact>

Or click to **Contacts Book** option from user sidebar

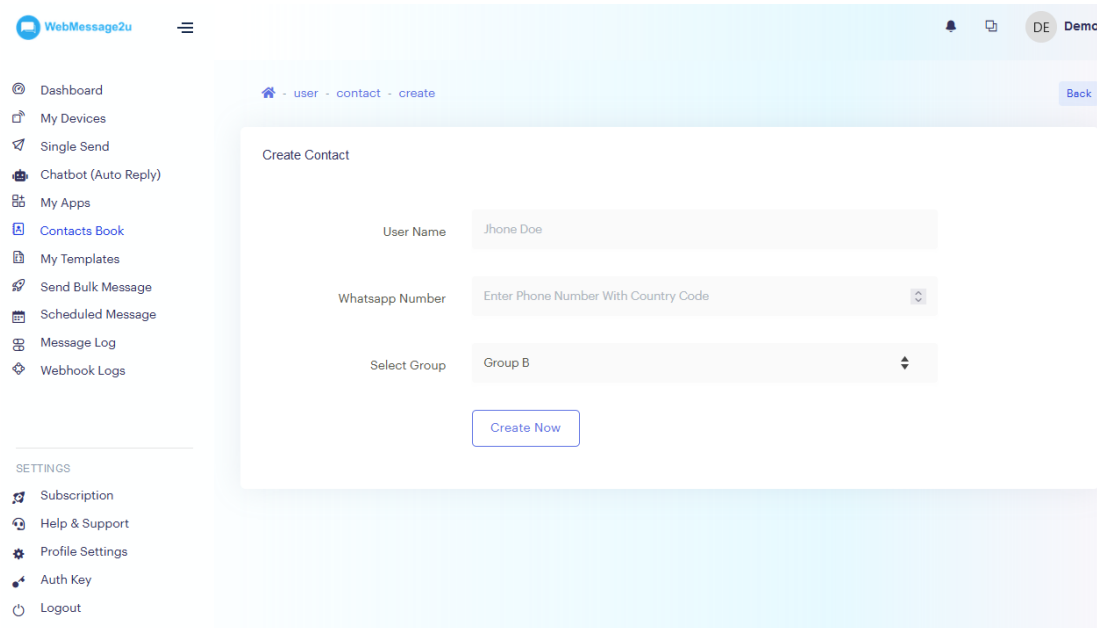

The screenshot shows the WebMessage2u interface. On the left is a sidebar with navigation options: Dashboard, My Devices, Single Send, Chatbot (Auto Reply), My Apps, **Contacts Book** (highlighted), My Templates, Send Bulk Message, Scheduled Message, Message Log, and Webhook Logs. Below this is a 'SETTINGS' section with Subscription, Help & Support, Profile Settings, and Auth Key. The main content area is titled 'Contact List - user - contact' and includes buttons for 'Create Contact', 'Contact Groups', 'Import Contacts', and 'Sent Bulk With Template'. It features two summary cards: 'Total Contacts' showing 3 and 'Contacts statics' showing 3 / 5000. Below these is a table of contacts.

CONTACT NAME	GROUP	WHATSAPP NUMBER	ACTION
Adam	GROUP B	60122920011	Action ▾
Bryan	GROUP B	60133214567	Action ▾
Thomas	GROUP A	60121234567	Action ▾

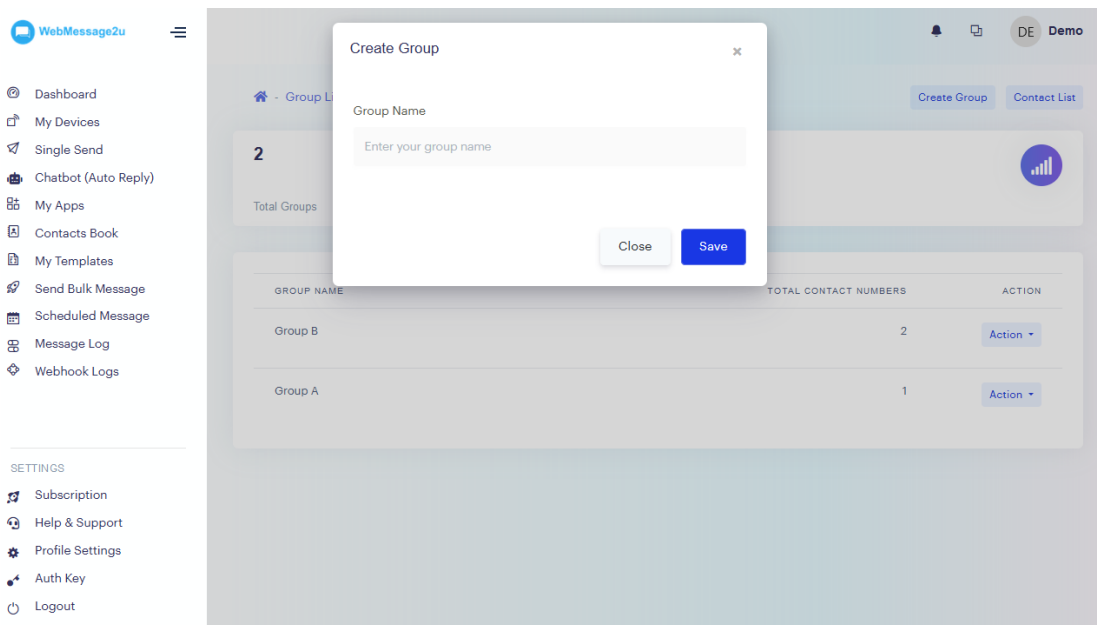

This page displays the list of contact numbers which you have created manually or imported into your account. It will be used for sending of messages individually or via bulk.

When you click on Create Contact, you will see the following where you can then enter the name of the contact, the mobile number and also the group to which it should belong to.

The screenshot shows the 'Create Contact' form in the WebMessage2u dashboard. The form is titled 'Create Contact' and is located under the 'user - contact - create' breadcrumb. It contains three input fields: 'User Name' with the value 'Jhone Doe', 'Whatsapp Number' with the placeholder 'Enter Phone Number With Country Code', and 'Select Group' with the value 'Group B'. A 'Create Now' button is at the bottom of the form. The left sidebar shows the dashboard menu with 'Contacts Book' highlighted. The top right shows a 'Demo' user profile.

Prior to that, if the group that you wish to link a contact to is not there, you may click on **Create Group** to manually create a group.

The screenshot shows the 'Create Group' modal in the WebMessage2u dashboard. The modal is titled 'Create Group' and has a 'Group Name' input field with the placeholder 'Enter your group name'. It has 'Close' and 'Save' buttons. The background shows the 'Groups' page with a table of existing groups. The table has columns for 'GROUP NAME', 'TOTAL CONTACT NUMBERS', and 'ACTION'. It lists 'Group B' with 2 contacts and 'Group A' with 1 contact. The left sidebar shows the dashboard menu with 'Groups' highlighted. The top right shows a 'Demo' user profile.

GROUP NAME	TOTAL CONTACT NUMBERS	ACTION
Group B	2	Action
Group A	1	Action

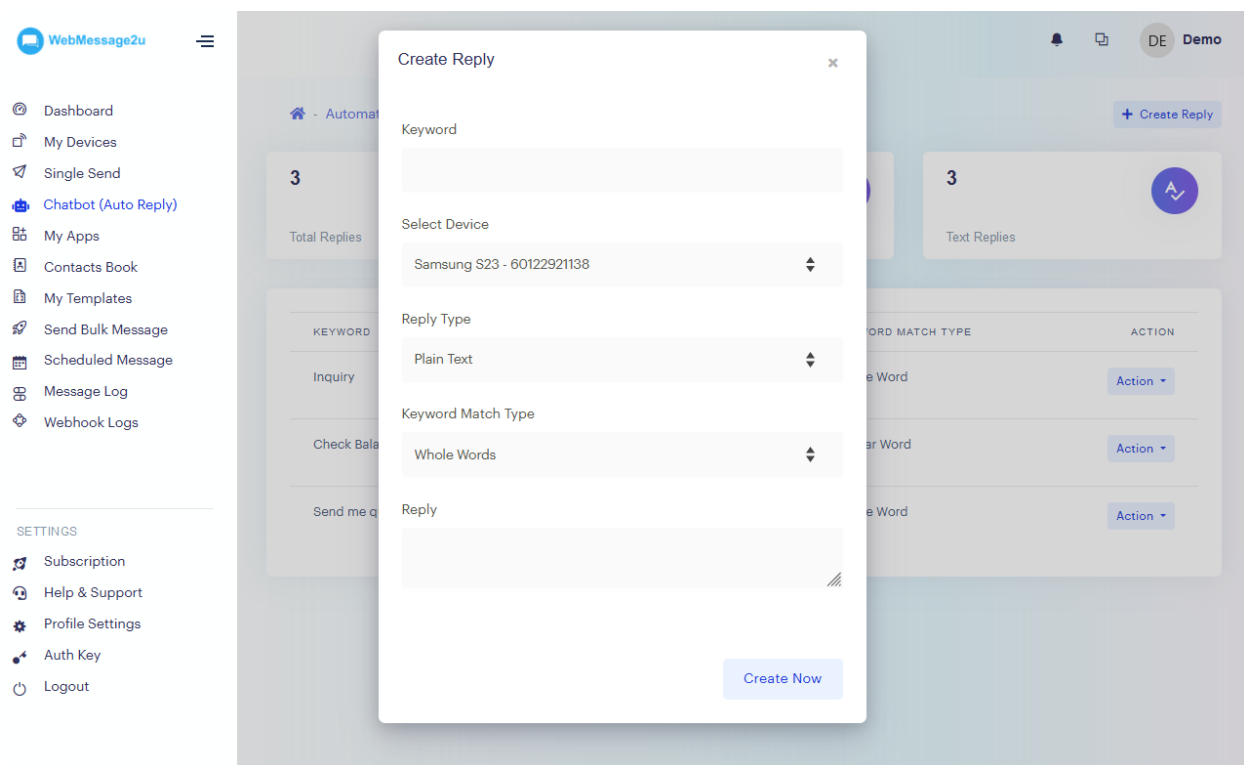

9. Create Chat Bot - How to create chatbot or auto reply

The chatbot feature will allow you to automatically send messages to your audience when their inbound messages match your specified keywords.

Go to <https://www.webmessage2u.com/user/chatbot>

Or click to **Chatbot** option from user sidebar.

and click **Create Reply** button

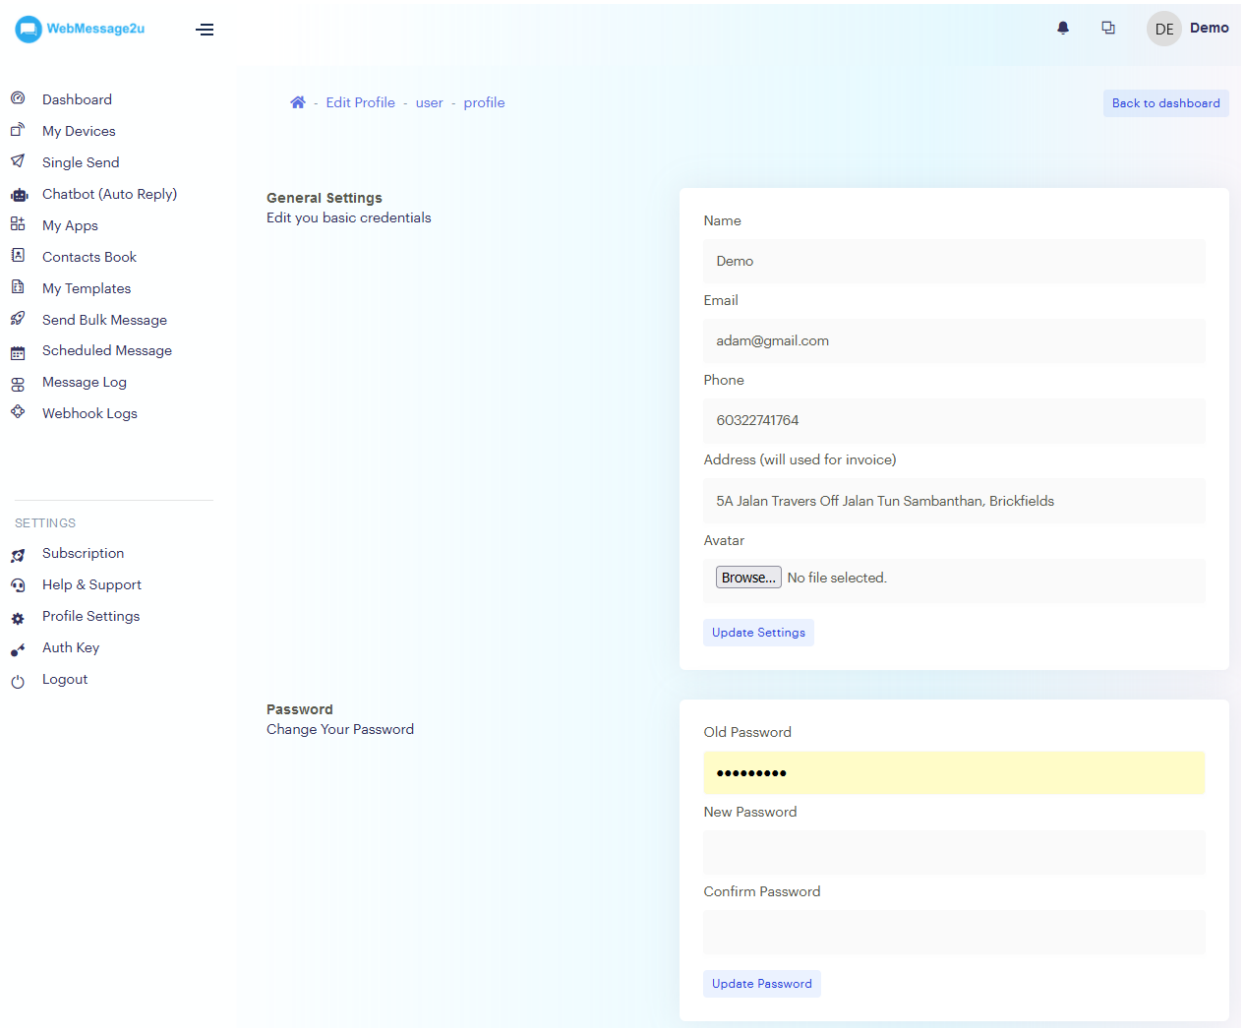

1. Keyword (it is used for set reply based on this word like 'Hi')
2. Select Device (Which device from this bot will work)
3. Reply Type (Select Type for what type of reply the user will receive if you select template type you need select template)
4. Reply (Set reply answer like if your customer sent message 'hi' and if you set 'hello' your audience will receive 'hello')

11. Change Credentials

Open your browser & go to <https://www.webmessage2u.com/user/profile>

Or click to **Profile Settings** option from user sidebar

The screenshot displays the 'Edit Profile' page for a user named 'Demo'. The page layout includes a sidebar with navigation options, a main content area with 'General Settings', and a right-hand form for updating profile information. The form fields are as follows:

- Name:** Demo
- Email:** adam@gmail.com
- Phone:** 60322741764
- Address (will used for invoice):** 5A Jalan Travers Off Jalan Tun Sambanthan, Brickfields
- Avatar:** Browse... No file selected.

Buttons for 'Update Settings' and 'Update Password' are located at the bottom of their respective sections.

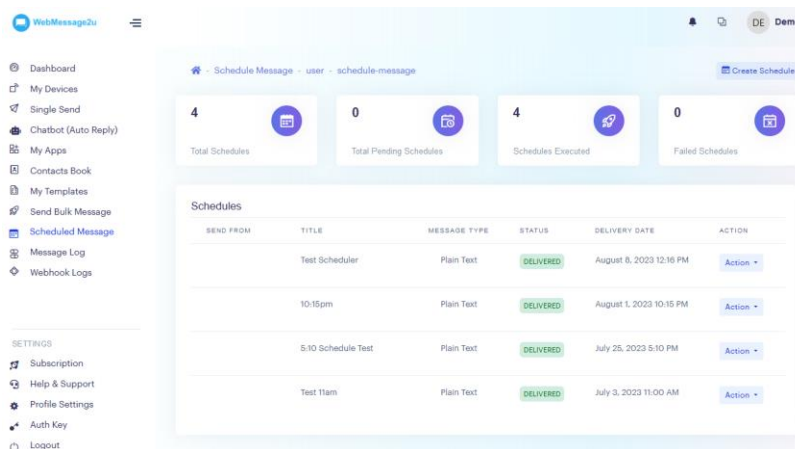

You may change your Name, Email, Phone, Address, Avatar as well as your password from this section.

12. Scheduled Message

Open your browser & go to <https://www.webmessage2u.com/user/schedule-message>

Or click to **Scheduled Message** option from user sidebar

Schedule Messages List

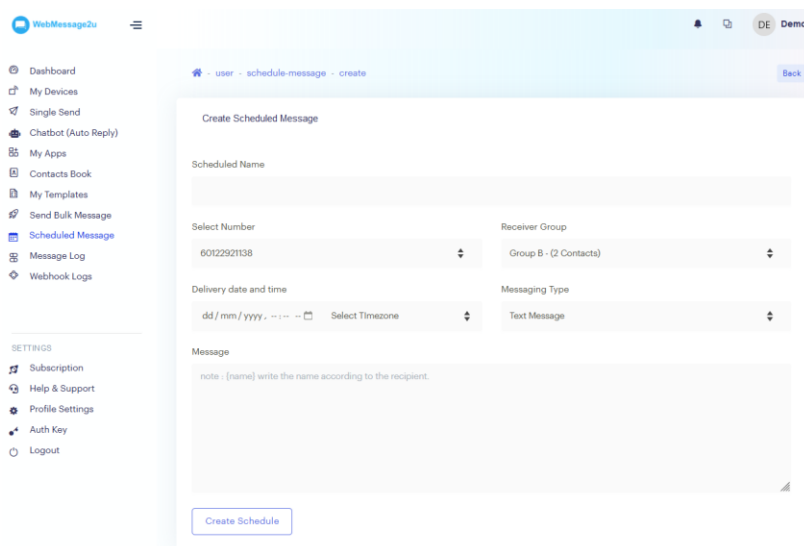

SEND FROM	TITLE	MESSAGE TYPE	STATUS	DELIVERY DATE	ACTION
	Test Scheduler	Plain Text	DELIVERED	August 6, 2023 12:16 PM	Action
	10:15pm	Plain Text	DELIVERED	August 1, 2023 10:15 PM	Action
	5:10 Schedule Test	Plain Text	DELIVERED	July 25, 2023 5:10 PM	Action
	Test 11am	Plain Text	DELIVERED	July 3, 2023 11:00 AM	Action

Create Schedule Message

Open your browser & go to <https://www.webmessage2u.com/user/schedule-message/create>

Or click to **Scheduled Message** > **create schedule** button from Scheduled Messages Page

Create Scheduled Message

Scheduled Name

Receiver Group: Group B - (2 Contacts)

Delivery date and time: dd/mm/yyyy, Select Timezone

Messaging Type: Text Message

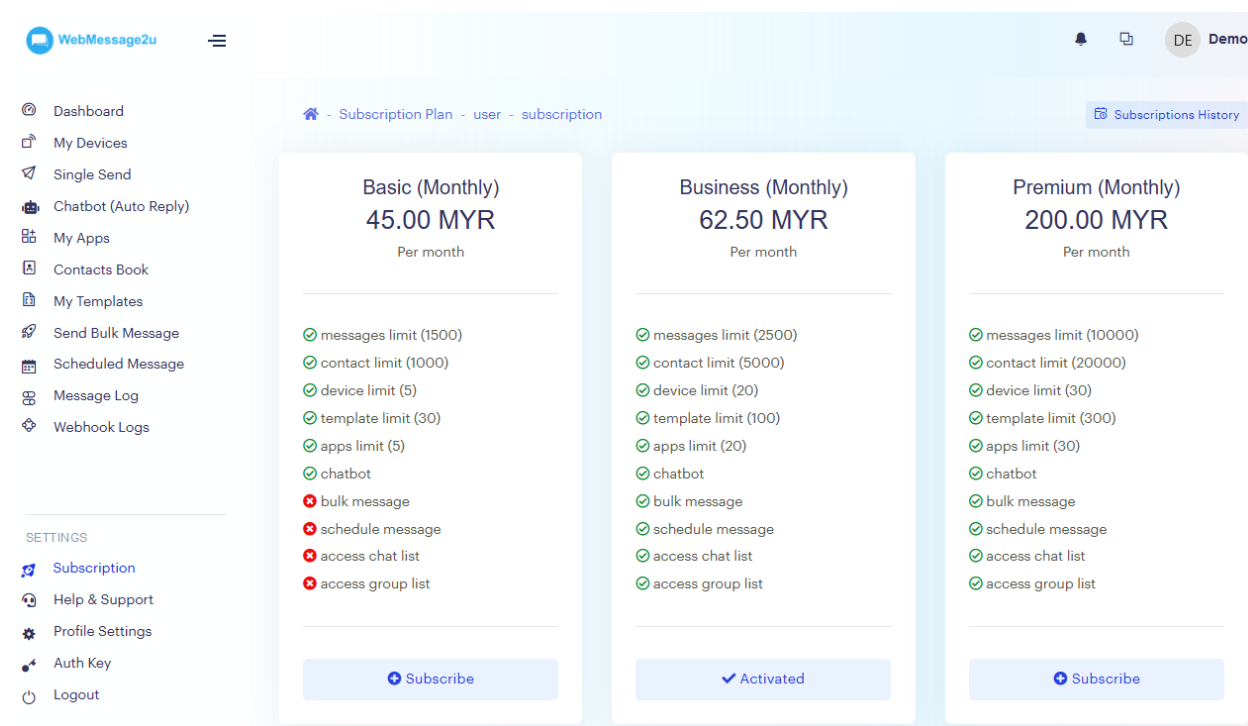

Message: note : (name) write the name according to the recipient.

Create Schedule

13. Subscriptions plan

Open your browser & go to <https://www.webmessage2u.com/user/subscription>

Or click to **Subscription** option from User sidebar

The screenshot displays the 'Subscription Plan' page for a user. The left sidebar contains navigation options like Dashboard, My Devices, Single Send, Chatbot (Auto Reply), My Apps, Contacts Book, My Templates, Send Bulk Message, Scheduled Message, Message Log, and Webhook Logs. Below this is a 'SETTINGS' section with links to Subscription, Help & Support, Profile Settings, Auth Key, and Logout. The main content area shows three subscription plans:

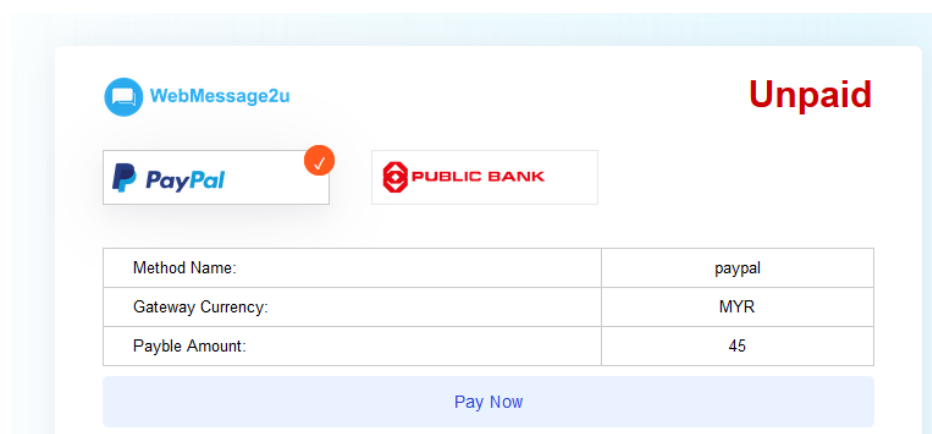

Plan Name	Price (Per month)	Status
Basic (Monthly)	45.00 MYR	Subscribe
Business (Monthly)	62.50 MYR	Activated
Premium (Monthly)	200.00 MYR	Subscribe

Each plan lists the following features:

- messages limit
- contact limit
- device limit
- template limit
- apps limit
- chatbot
- bulk message
- schedule message
- access chat list
- access group list

Enroll a plan

Click on **Subscription** > **subscribe** button from the plan list and it will redirect to payment page. We currently accept PayPal & Public Bank Deposits.

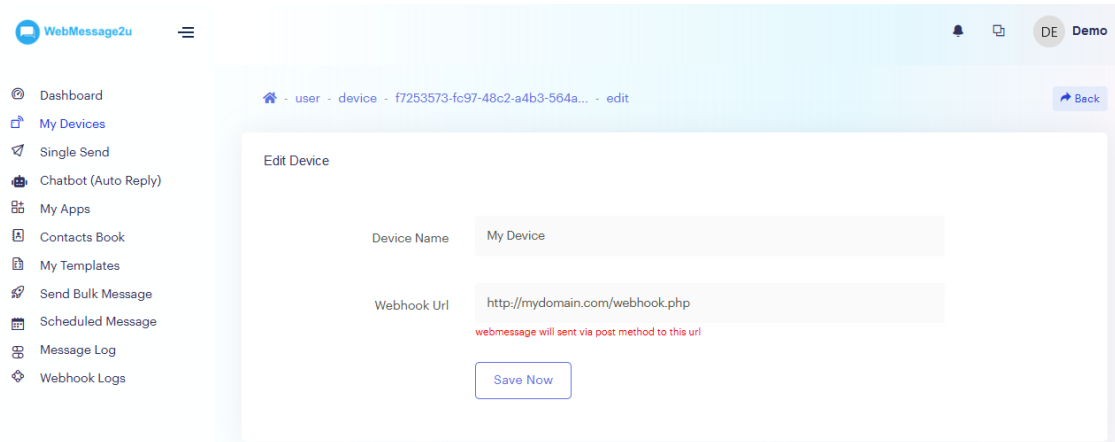

The screenshot shows the payment page for WebMessage2u. It features the 'Unpaid' status in red. There are two payment method buttons: 'PayPal' (with a checkmark) and 'PUBLIC BANK'. Below these is a table with the following details:

Method Name:	paypal
Gateway Currency:	MYR
Payble Amount:	45

A 'Pay Now' button is located at the bottom of the payment section.

14. How to use webhook

First, you will need to insert a WEBHOOK URL during device registration as per instructions above. You may also add the URL to any existing device by Editing the Device at <https://www.webmessage2u.com/user/device>

Here is an example PHP Code of “webhook.php” illustrating how the webhook receipt and response can be achieved. You just need to change the sections highlighted in yellow.

```
<?php
// Check if the request method is POST
if ($_SERVER['REQUEST_METHOD'] === 'POST') {
    // Read the JSON payload from the request
    $jsonPayload = file_get_contents('php://input');

    // Check if JSON data was received
    if (!empty($jsonPayload)) {
        // Decode the JSON data
        $data = json_decode($jsonPayload, true);

        // Check if the required data is present
        if (isset($data['payload']['conversation']) && isset($data['sender'])) {
            $conversation = strtolower($data['payload']['conversation']); // Convert to lowercase
            $sender = $data['sender'];

            // Determine the response based on the content of 'conversation' (case-insensitive)
            $response = "";
            $responseSent = false; // Flag to track if a response was sent

            if (stripos($conversation, 'TEXT A') !== false) {
                $response = 'Hello! You entered TEXT A';
                $responseSent = true;
            } elseif (stripos($conversation, 'TEXT B') !== false) {
                $response = 'Hello! You entered TEXT B';
                $responseSent = true;
            } else {
                $response = 'Message Received Thank You';
            }
        }
    }
}
```

```

    $responseSent = true;
  }

  // Send an email with the received text, response status, and response text for troubleshooting purposes.
  $to = 'your@email.com';
  $subject = 'Received Payload';
  $message = "Received JSON Payload:\n\n";
  $message .= "Conversation: " . $data['payload']['conversation'] . "\n";
  $message .= "Sender: $sender\n";

  // Include response status in the email
  if ($responseSent) {
    $message .= "Response Sent: Yes\n";
    $message .= "Response Text: $response\n";
  } else {
    $message .= "Response Sent: No\n";
  }

  // Send the email
  if (mail($to, $subject, $message)) {
    echo "Email sent successfully.";
  } else {
    echo "Email could not be sent.";
  }

  $receiverNumber = $sender; // Assuming you want to respond to the sender

  $curl = curl_init();
  curl_setopt_array($curl, array(
    CURLOPT_URL => 'http://www.webmessage2u.com/api/create-message',
    CURLOPT_RETURNTRANSFER => true,
    CURLOPT_ENCODING => '',
    CURLOPT_MAXREDIRS => 10,
    CURLOPT_TIMEOUT => 0,
    CURLOPT_FOLLOWLOCATION => true,
    CURLOPT_HTTP_VERSION => CURL_HTTP_VERSION_1_1,
    CURLOPT_CUSTOMREQUEST => 'POST',
    CURLOPT_POSTFIELDS => array(
      'appkey' => 'ENTER_YOUR_APP_APIKEY',
      'authkey' => 'ENTER_YOUR_AUTH_KEY',
      'to' => $receiverNumber,
      'message' => $response,
      'sandbox' => 'false'
    ),
  ));

  $response = curl_exec($curl);

  curl_close($curl);

  echo "Response sent: " . $response;
} else {
  echo "Invalid JSON data format. Missing required fields.";
}
} else {
  echo "No JSON data received.";
}
} else {
  echo "Invalid request method. Only POST requests are accepted.";
}
?>

```
